SUMMARY

Final-year B.Tech Information Technology student with a strong foundation in data analysis and machine learning. Proficient in Python, SQL, and data visualization tools, with a keen interest in deriving insights from data and solving analytical problems.

EDUCATION

MIT Art, Design & Technology University, Pune

Aug 2022 – Jul 2025

B.Tech in Information Technology

Shripatrao Bhosale Jr. College, Dharashiv

Jul 2019 – Jul 2022

Higher Secondary Education

PROJECTS

Infrastructure Monitoring System [Python, OpenCV, TensorFlow, Computer Vision]

- Designed an **AI-driven computer vision system** to automatically monitor construction sites and assess worker safety compliance in real time.
- Implemented **machine learning-based object detection models** to identify workers and verify usage of mandatory safety equipment such as helmets and reflective vests using YOLOv7.
- Developed an automated **violation detection and reporting pipeline**, transforming visual data into structured safety insights for proactive risk mitigation using ML.

Olympic Dataset Exploratory Data Analysis (EDA) [Python, Pandas, Matplotlib, Seaborn]

- Conducted large-scale **data cleaning, preprocessing, and feature engineering** on historical Olympic datasets spanning 120+ years.
- Applied **statistical analysis and visual analytics** to uncover trends in medal distribution, country dominance, and athlete demographics.
- Generated **actionable insights** through advanced visualizations to support data-driven storytelling and analytical reporting.

Major Project – OpenFactVerification [Python, NLP, Machine Learning]

- Designed and implemented an **automated fact-verification system** to detect misinformation using NLP and ML techniques.
- Built a complete pipeline including **text preprocessing, feature extraction, and classification** for claim verification.
- Evaluated model performance using standard metrics and optimized results through iterative tuning and data refinement.

INTERNSHIP

ML Intern at iMH

May 2024

- Created a dataset to predict the best college for students based on JEE scores and various parameters (Year of examination, Round number, Quota, Institute type, Program type).
- Performed analysis on the dataset and implemented a prediction model using **Random Forest** with enhanced classification performance for NITs and IITs across multiple factors.
- Achieved a mean accuracy of **81.6** in predicting college admissions.

Investment Banking Virtual Intern – J.P. Morgan (Forage)

Sep 2025

- Completed a virtual job simulation focused on **investment banking and M&A advisory**.
- Analyzed potential **M&A target companies**, evaluated strategic fit, and reviewed auction processes.
- Performed **financial analysis and valuation modeling** to assess deal feasibility and risks.
- Developed a structured **investment recommendation** based on financial metrics and strategic rationale.

TECHNICAL SKILLS

Programming Languages / Frameworks: Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV

Developer Tools: Tableau, Power BI, Excel, MySQL, PostgreSQL, MongoDB, Git, GitHub, AWS, Azure

Coursework / Core: Data Analysis, Machine Learning, Statistics, Data Preprocessing, Model Evaluation, Computer Vision, Database Management Systems

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations
- RDBMS PostgreSQL Training (IIT Bombay)
- Google Data Analytics Professional Certificate
- Excel for Data Analysis Specialization
- Power BI Essential Training
- Tableau Data Visualization Course (2024)
